Use the boxes below to tell us the photos that you want in your Photo Album or Photo Book, and the order that you want them put in. If you would like us to decide the best order  Tick Here

Always enter the Image Numbers of the Photographs, for example, if the image file is 'IMG\_1234' then enter "1234" into the box. If you are viewing using an Internet Web Browser or Picture Viewer program, DO NOT use the sequence number, for example 24/220, because some programs may show the photos in a different order from others. The 'IMG\_' numbers are always correct. For Photo Books we recommend that you allow us to decide the order - you will get to see a PDF proof version of your Photo Book before it is printed.
